SUMMARY

Machine learning engineer with hands-on experience building and deploying deep learning models for algorithmic trading. Proficient in PyTorch, TensorFlow, and LLM tooling (LangChain), with experience shipping end-to-end ML pipelines on AWS and Kubernetes. Strong foundation in statistical modeling, time-series forecasting, and production ML systems.

EXPERIENCE

Machine Learning Engineering Intern — Proceedit

Mar 2026 – Present

Barcelona, Spain

- Developed, tested, and deployed hybrid deep-learning models for algorithmic trading strategies
- Optimized quantitative models through systematic hyperparameter tuning and feature engineering
- Built end-to-end ML pipelines using AWS, Kubernetes, FastAPI, and PostgreSQL, taking models from research through to production deployment

Statistical Data Science Intern — Schaumaplast

Nov 2025 – Feb 2026

Lodz, Poland

- Built an industrial data-analytics platform with predictive models for large-scale manufacturing production datasets
- Implemented Statistical Process Control (SPC), regression, and deviation-based analytics for real-time process monitoring and forecasting
- Designed data preprocessing pipelines and improved throughput via down-sampling techniques

PROJECTS

Shallow Neural Network — Gaussian & MNIST Classifier ([GitHub](#))

Built a multilayer perceptron from scratch to classify handwritten digits from the MNIST dataset, implementing forward and backward propagation without a deep learning framework.

Artificial Neuron — 2D Classification ([GitHub](#))

Implemented an artificial neuron classifier performing 2D binary classification across multiple activation functions, with real-time

SKILLS

- **Machine Learning:** Deep Learning, LLMs & LangChain, XGBoost, Time-Series Forecasting, Statistical Modeling
- **Frameworks:** PyTorch, TensorFlow
- **Cloud & MLOps:** AWS, Azure, Docker, Kubernetes, CI/CD
- **Languages:** Python, C++, SQL
- **Backend & Tools:** FastAPI, Flask, PostgreSQL, Git, Jira

EDUCATION

Lodz University of Technology

Oct 2022 – Oct 2026

Bachelor of Science in Business and Technology — Lodz, Poland

Thesis: Deep Learning-Based Time-Series Modeling for Early Defect Detection in Manufacturing Systems

Relevant Coursework: AI Fundamentals, Information Technology I & II, Data Analytics, Mathematics I, II & III

CERTIFICATIONS

- LangChain & LangGraph – *Packt*
- Mathematics for Machine Learning – *Imperial College London*
- AWS Cloud Solutions Architect – *Amazon Web Services*
- IELTS C1 – *The British Council*

ADDITIONAL

Strengths: Clear communication, Analytical problem-solving, Fast adaptability, Collaboration, Proactive

Volunteering: Clothing Sorter for Orphans & Cook for Homeless (No Hate Foundation)

Interests: Chess, Rubik's Cube
